

SimplyNano 1[®]

What is the „SimplyNano 1[®] experimental kit“?

„SimplyNano 1[®]“ is the experimental kit for nanotechnology and contains **8 exciting experiments** to the topics **nano surfaces, nano dimension and reactivity of nano particles**. It can be used from **7th to 10th grade** or also for **vocational training** to introduce **phenomena of nanotechnology** to students. On the enclosed USB stick are **instructions for students, comments for faculty staff and presentation slides**. All materials have an **emphasis on comprehensibility and attractive graphical material**.

Developer of the „SimplyNano 1[®]“

The „SimplyNano 1[®]“ experimental kit was developed by **The Innovation Society, St. Gallen** on behalf of the **SimplyScience-Foundation**. The company is an international consulting and competence centre for new technologies and advises public and private organizations in innovation management as well as science communication and education (Swiss Nano-Cube, TeachNano-courses).

Purchasing a „SimplyNano 1[®]“

The „SimplyNano 1[®]“ experimental kit can be purchased in our webshop:
<http://www.innovationsgesellschaft.ch/webshop>

Price: 500 € / 600 CHF (excl. Taxes and Shipping).
